Veterinary Oxygen Therapy. Simplified.

Controlled oxygen delivery, continuous monitoring, and automated operation in one clean system.

OXYGEN PET THERAPY

"Empowering Recovery, One Breath at a Time"

"Veterinary Oxygen Therapy. Simplified."

"Trusted Innovation in Oxygen Pet Therapy"

Engineered for precision and peace of mind, OXYPET delivers up to 10L/min of blended oxygen flow—quietly and efficiently.

Its advanced sensor system continuously monitors oxygen levels inside the chamber, ensuring optimal conditions for your pet's therapy.

With 24/7 automated control, this oxygen concentrator maintains the perfect air flow balance, allowing you to focus on care, not calibration.

Who is GSE International?

GSE International is a "Leading Global Manufacturer of Oil-Free OEM Vacuum Pumps & Compressors."

Established in 1997, we produce high-quality pumps for prominent brand manufacturers across various industries, specializing in Medical, Automotive, Beverage, Environmental, and Industrial Applications.

What is OxyPet?

OXYPET is an "Oxygen Pet Therapy" Division of GSE International, dedicated to improving pets' well-being by providing innovative and effective oxygen therapy solutions. Our mission is to help pets breathe easier and enhance their quality of life.

As the demand for advanced pet healthcare increases, we identified a gap in the market for specialized pet oxygen therapy services. OXYPET aims to fill this gap by offering a range of non-invasive oxygen therapy options for pets suffering from respiratory issues, enabling them to recover quickly and comfortably.

We'll collaborate closely with veterinarians and pet owners primarily to promote oxygen therapy products like the OXYPET systems.

"Oxygen therapy increases the amount of oxygen available to tissues, which promotes faster wound and surgical-site healing, supports recovery after trauma, and helps organs that are starved for oxygen."

OXYGEN PET THERAPY

"Empowering Recovery, One Breath at a Time"

"Veterinary Oxygen Therapy. Simplified."

The **OxyPet System** provides up to 10 L/min of smooth, quiet oxygen flow while smart sensors maintain ideal chamber levels. Its fully automated system keeps therapy conditions stable day and night, eliminating the need for constant calibration.

OxyPet System

Medical grade GSE Int'l oil-free compressor ZW280 Series

OxyPet Unit - Features

- Vertically Integrated Manufacturer
- Ultra Quiet Unit <45-dBA during operation
- Adjustable Oxygen Purity 30% - 40% - 50%
- Maximum Blended Oxygen Flow of 10 L/min
- Global Quality Manufacturing with ISO 9001 & ISO13485
- Medical Grade Oxygen Concentrator & Compressor
- Power Supply Options for 115V/60Hz and 230V/50Hz
- Built-in O2 Concentrator Failure Alarm
- Carbon dioxide monitor system
- No Venturi Valve Needed (auto-adjust)

OxyChamber

***No Venturi** Valve Needed*
Automatic Digital Control

The **OxyChamber** delivers medical-grade oxygen therapy tailored for veterinary and at-home use. Engineered to prioritize comfort, safety, and clinical effectiveness, creating a stress-free environment that promotes rapid recovery for pets with respiratory needs.

OxyChamber - Features

- Controlled Oxygen Delivery: Adjustable oxygen concentration levels (typically 30–50%) to meet specific therapeutic needs.
- Transparent Construction: Acrylic or polycarbonate walls allow for continuous visual monitoring without disturbing the pet.
- Ventilation System: Integrated airflow design prevents CO_2 buildup and maintains oxygen and air balance.
- Sound Reduction: Quiet operation minimizes stress, especially for anxious or respiratory-compromised animals.
- Portability Design: Lightweight chambers with handles for easy transport and clinic integration.
- Quick Access Panels: Easy-open doors for immediate intervention without removing the pet.
